**Scott,**

**Here is the culling letter of authority. There are two versions attached – one without number limitations (Itrauthno#s) and with number limitations (Itrauthcull). Below is the paragraph that contained the number limitations, for quick reference.**

**I have updated both versions of this letter to include Tom Spezze and myself as permittees. This permit operates on the calendar year and it's up for renewal Jan. 1, 2004.**

**Contact me if there's anything I can do to help run this through the ranks for approval. FYI: I've written to Wyoming and asked for a renewal of our permit to cross state boundaries during culling operations. Thanks, fq.**
